(Rev: Jan 2016)

11.1.10 No rider will be allowed to ride more than one class per sanctioned event.

11.1.11 Guidelines for promoting Cross Country Meets will be sent to Active Members requesting sanctions for meets of this type.

11.1.12 A riders' meeting must be held before the event to inform the riders of the types and manner of course marking, starts, checking, fuel stops, etc. This may be done by means of a printed information sheet given to each rider. The sponsoring club must designate the pit and/or refueling areas and will police them to ensure compliance with District 36 rules.
11.1.13 The sponsoring club or promoter will supply a participation sticker or a finisher's pin to all legal finishers of said event. A legal finisher is considered a rider who has completed 50% of the number of laps completed by the winner of that particular class. Clubs or promoters shall submit a Finisher Pin or Event Sticker to the Cross-Country Steward for approval prior to the meet.

11.1.14 Club’s and promoters who wish to be part of the District 36 Cross Country Championship Series are required to use a District 36 approved Scoring Person/Company and Scoring Program. (Rev Dec 2017)

SECTION 11.2
ENDURO MEETS

11.2.1 An Enduro is an Amateur event where speed is not the determining factor and wherein a time schedule must be maintained. It is conducted over paths, roads, trails, and other natural terrain with a series of secret checkpoint locations to determine time schedules. The rider who maintains the closest time to the schedule is the winner. Other rules that cover different Enduro formats that may be used are listed in the FIM and AMA rule books and supplements. (Rev Jan 2016)

11.2.2 Special equipment requirements for Enduro are:

A. All motorcycles shall be fitted with a spark arrester as well as a muffler not exceeding the decibel requirements set forth in this book.

B. Each machine entered must have an off-road permit or be licensed in the state where the machine is normally kept.

C. Kitted bikes (bikes which have an altered bore and/or stroke other than stock) will be allowed in all Enduro classes. The rider must declare the bike's displacement on the entry form, and the bike may only be entered in the class or classes for which its kitted displacement is allowed.

11.2.3 The announcement of the meet must be sent to the District Enduro Steward, at least two (2) weeks prior to the acceptance of entries. No Enduro shall allow more than 750 riders to compete; a smaller limit may be used if necessary. Entry fees must be returned to those riders not permitted to compete because of rider limits. (Rev June 2016)

11.2.4 Riders found riding in the wrong class or engine class, or engaged in illegal practices, will be disqualified from the event and shall have cards pulled for at least the next meet. The following shall be considered to be illegal practices:

A. Use of radio equipment.

B. Pre-riding any part of the course within 24 hours of start time.

C. Changing riders, machines, or numbers during event.

D. Carrying gasoline anywhere on a rider's body.

E. Having confidential course information that could result in an unfair competitive advantage.

11.2.5 I.S.D.E. Qualifiers or non-national qualifiers will be under the jurisdiction of the Enduro Steward and all riders shall have a Membership card. Qualifier meets will follow the rules as described in the AMA & FIM rule books. Promoters of Qualifiers must provide the results to the Enduro Steward.

(Rev. 1 Dec 2018)

11.2.6 COURSE

11.2.6.1 The course must be 70 actual ground miles in length or longer for A and B riders and/or 50 actual ground miles for C riders in length or longer. The Enduro Steward has the authority to approve a shorter course, but not less than 60 ground miles for A and B riders in the case of extenuating circumstances. (Rev Jan 2015)

11.2.6.2 The course must be clearly and properly marked by the promoting club. An arrow will be placed 30 to 50 feet prior to a direction change and two arrows at the point of change. Two (2) off course markers (W's) must be placed one on each side of the road or trail, no more than 150 yards from the turns.

11.2.6.3 The following course markers will be used:
Arrows on a contrasting background to only indicate turns. Solid circular dots on contrasting background to indicate straight sections of the course, colored streamers, lime or gypsum.

11.2.6.4 Riders must remain on the marked course. A rider who leaves the course may continue the meet only by re-entering the course at the same point. A marked course shall mean within 25 feet of the course markers. (Rev. 20 Oct 2005)

11.2.6.5 Three or more X's or 3 arrows pointing down should be used to indicate an area that requires a high level of skill. These indicators should be placed far enough ahead so that the fastest of riders will be given sufficient time to adjust his speed to the level of skill he deems necessary.

11.2.6.6 Other course markers will include a "W" (wrong direction) and an "A" (off course alternate route) and "SH" (side hack) and "penalty route" for the penalty route. The penalty route will have the penalties for its use clearly shown. A description and display of all course markers used in the event must be visible to each rider at the starting line.

11.2.6.7 The entire course must be swept by the promoting club after the closing of the checks. The sweepers must either direct a bonafide contestant to the most direct or best route to the start/finish area, take his name and number for relay to start/finish area, or bring the rider out with them.

11.2.6.8 Riders may assist each other on any part of the course, but riders may not receive outside assistance, unless in the interest of safety.

11.2.6.9 Any two-way contestant traffic areas on the course must have signs warning riders of such a condition. Warning notices of traffic and of the possibility of non-contestant vehicle traffic shall be placed at the start area.

11.2.6.10 All course markers must be removed by the promoting club within two weeks of the date of the meet.

11.2.6.11 A maximum of 4 riders may start per minute at Enduros with 500 riders or less. A maximum of 5 riders may start per minute at Enduros with more than 500 riders. Figures to be based on previous year’s attendance.

11.2.6.12 Portions of the event that use the same course more than once must be marked with different colored markers each time used.

11.2.7 CHECKING

11.2.7.1 All mileage must be taken on the same day with the same machine. Averaging is not permitted. A statement indicating the machine and type of mileage meter drive used (front wheel or other) shall be posted at the start.

11.2.7.2 At least one mileage check must be provided before the first secret check at a distance of 2.9. Course mileage will be indicated by signs at each 5-mile increment. Mileage markers are not required at turns as required in the AMA rulebook.

11.2.7.3 All checks must be identified with a sign containing the following information: the word "check", its number, the speed average to be maintained for the next check, the key time of the check and the mileage to that check from the start.

Checks must be in ascending order, and all checks must be located so the key time is a full (even) minute. Any rider arriving within 59 seconds after the even minute shall be recorded as arriving on that minute.

Riders must not stop within sight of a check or their time will be taken when their forward motion stops.

Putting a foot down shall not indicate point of timing, but time will be taken if the rider zigzags or paddles to stall time.

Taking the time of a stopped rider within sight of a checkpoint is only permissible when that rider can be identified by the checkpoint crew without leaving their position behind the checkpoint line.

11.2.7.4 The key times must always be shown for rider zero (#0). At least two (2) different speed averages must be used.

11.2.7.5 If speed changes between checks are used, they must be located so the key time is a full (whole) minute. In addition to showing the average speed to be maintained, the mileage must be shown.

11.2.7.6 The mileage to each check location or speed change must be in multiples of one tenth of a mile.

11.2.7.6.1 Check mileage must be accurate within +/- .05 miles (264 feet) from the last posted mileage marker. (Rev.15 Dec 2004)

11.2.7.7 Checks must not be more than 35 miles apart. Secret checks must not be located less than 3 odometer miles from any known control or secret check.

11.2.7.8 There must be at least one gas stop or gas available location for each 50 actual ground miles. The promoting club must transport the contestant's fuel to the gas location. Entrants must not have to buy fuel. A minimum of ten (10) minutes shall be provided for each gas stop or gas available. (Rev. 18 Dec 2013)

11.2.7.9 A "known control" is one whose mileage is known at the start by all entrants. Arrival times must be taken from such checks but there shall be no penalty for arriving early at a known check unless the rider is more than 15 minutes early. (Rev. 18 Dec 2003)

11.2.7.10 A "secret check" is one whose mileage key time, and location is unknown to all entrants. Arrival times must be recorded at all secret checks. A minimum of five (5) secret checks must be used. Secret checks may not be used at a speed average of 6 mph or less.

11.2.7.11 An observation check may be used for determining that every contestant has traversed the entire course. Arrival times are not scored, but each rider’s number must be recorded.
11.2.7.12 Start Control - a timed checkpoint designating a starting or a release point. A point whose mileage and key time are listed on the route sheet. A timed check immediately preceding a start control may be located without regard to the 3-mile check separation rule, but the timed check immediately following a start control must meet the 3-mile check separation rule.

11.2.7.13 All checks must be opened 15 minutes before the due in time of the first rider and shall remain open one hour 59 seconds after the due in time of the last rider entered.

11.2.7.14 If a Gas Stop is used all riders must be checked in and out. A Gas Stop must not have a timed check within 2 miles before the check in and 3 miles after the check out. Penalty points must be given for early departure and may be given for late departure from the Gas Stop. Only a "Gas Stop" is subject to the 2/3-mile timed check rule. (Rev. 18 Dec 2003)

11.2.7.15 All events will use the "flip-card" system. If multiple (separate) time schedules are used for A, B or C classifications clock time can be used. (Rev Jan 2015)

11.2.7.16 A. A flip card system is a system where the flip card number is visible to the rider as the front wheel crosses the check line. The flip card number may be visible to the riders before they cross the check line, but this is not required. Seconds may be visible to the riders at some time, but this is not required. The District 36 clocks are a digital flip card system. (Rev. 28 Nov 2007)

11.2.7.17 All riders shall receive an arrival number at each check in place of the time. Tiebreaker checks will record Flip Card number and seconds. Actual time must be given at any check to any rider who requests it.

11.2.7.18 A register of all riders and the arrival times must be kept at each check, by check personnel.

11.2.7.19 A plastic coated rider scorecard will be used at all events. The scorecard will be carried by the rider and have a place for the rider's name, riding number, and check number.

11.2.7.20 Emergency points shall be figured from the 30-second mark of his due minute.

11.2.7.21 Checking stations shall use the following flags which shall measure not less than 18" x 18" with a 10" black letter.
   a. Known Control--Yellow Flag with "K".
   b. Observation Check--White Flag with "O".
   c. Secret Check--Red and White Flag with "S".
   d. Emergency Check--Green and White Flag with "E".
   e. Start Control –Yellow and White with diagonal black stripe with black letters “ST”

   Two flags will be used per check or control.

11.2.7.22 All flags must be conspicuously displayed and will designate the exact checking point.

11.2.7.23 Checking time shall be taken the instant the rider's front wheel shall have arrived opposite the two (2) flags. The imaginary line between the two flags should be indicated with lime.

11.2.7.24 Mileage resets (added mileage to give time) will be considered “ground mileage” (official) and this mileage may be used in placing subsequent timed checks. Resets, however, are not allowed two tenths (2/10) or less of a mile before a checkpoint or 1/10th of a mile after a checkpoint. (Rev. 28 Nov 2007)
**11.2.7.25** "Reverse" resets (subtracted mileage to make a rider late) will not be allowed. Free time or separate class speed averages may also be used.
A reset to Zero (0) may be used if the same loop is used more than once. (Rev. 18 Dec 2013)

**11.2.8 TIMING**

**11.2.8.1** The promoting club will receive the District 36 Digital Enduro Clocks prior to the event from the Enduro Steward or a District 36 Committeeman. All clocks will be set to the second from the master clock used at the start of the day of the event. All clocks must be accurate to within 5 seconds within a 12-hour period.

**11.2.8.2** All checkpoint clocks must be displayed at the finish or sign ups marked with the number of the check, as soon as possible after the checks have been closed. (Rev. 18 Dec 2013)

**11.2.8.3** Each clock must be compared to the Master Clock as soon as possible after the check is closed and certified by the Event Referee as to the difference, if any, between the two clocks. Any clock with more than 5 seconds difference shall be considered eliminated and that check used for observation purposes only.

**11.2.8.4** The Master Clock must be available in the starting area or at signups the day before the event. (Rev. 18 Dec 2013)

**11.2.8.5** District 36 Digital Enduro Clocks will be used. A twenty ($20.00) dollar fee will be charged per meet for the use of the clocks to clubs or promoters who use them.

**11.2.9 SCORING**

**11.2.9.1** All scoring will be on a "points lost" basis: the best score being zero.

**11.2.9.2** Points will be lost as follows:
   a) One point for every minute late.
   b) Two points for the first minute early.
   c) Five points for each additional minute early.

**11.2.9.3** Non-finishers will have 500 points added to their score and their positions will be determined by the number of checks completed and then by the score to that check.

**11.2.9.4** A rider who is more than 1 hour 59 seconds late or more than 15 minutes early at a check will be out at that point. He/She shall be credited with the mileage to the last timed checking station and is eligible for awards on that basis.

**11.2.9.5** Any penalty section points must be added to the rider's score before positions are determined.

**11.2.9.6** The register of riders from each check must be reviewed to verify the scores of trophy winners before the results are made official.

**11.2.9.7** In emergency check scoring: always develop the score from the 30-second mark of the rider’s due minute.

**11.2.10 ENTRIES**

E. At the discretion of the promoting organization and with approval of the Enduro Steward, special course markings may be used to identify separation of the course for different rider skill levels. The markings must be shown at signups and discussed at the riders meeting.

11.3.6.4 The entire course must be swept by the promoting organization after the closing of the checks. The sweepers must either direct a participant to the most direct or best route to the start/finish area, take his name and number for relay to the start/finish area, or bring the rider out with them.

11.3.8.4.3 All riders must stop at Check-Ins. Riders will enter Timed Sections at 15-second intervals as directed by Check personnel. When a rider is in-line for the start of the Timed Section, the start of the Timed Section will begin on the next available 15-second interval even if the rider is not ready. Rider scorecards shall be marked at all Check-Ins and a back-up scoring book shall be used. If enough District clocks are not available for all the Timed Sections, Timed Section crews can use reliable and accurate digital watches. The same watches must be used at the start and end of the Timed Section for the duration of the event. If watches are used, the promoting organization must notify the riders at sign-in, the rider’s meeting or at the start line. (Rev Jan 2016)

Known Checks can be within any mileage of another known control, there is no check free zone.

11.3.8.5.7 Riders may stop at any time before a Known Check, in order to wait for their scheduled arrival time. When the rider’s front wheel crosses between the check flags, this establishes the departure time from the check for the rider.

SECTION 11.7
VINTAGE RULES

11.7.0 Preface. The purpose of racing Vintage motorcycles is twofold. First to preserve obsolete racing motorcycles as close to the way in which they were used in competition, and to actively compete on these motorcycles that were the backbone of motorcycle racing in the USA.

11.7.1 Classes: Late model vintage (thru 1978 model years), Modern vintage (thru 1974 or earlier), Classic vintage (1967 and earlier), Dinosaur vintage (1951 and earlier), riders age 50 and over (any vintage motorcycle), Pushrod 500.

11.7.2 General Specifications: Applies to all motorcycles entered in Vintage classes at District 36 races, any differences for a specific class division will be listed in that class division. Motorcycles may be two or four stroke and must be in good working order. Any modifications must be in a workmanship manner and be consistent with the spirit of the period. Frames and swing arms must be in the same type of tubing, style, and manner as the original and or period. Front forks may be changed, though must be period. Shocks may be changed, and mono shock and cantilever rear suspension is prohibited unless original equipment. Gas shocks will be permitted. However, they must not have remote reservoirs, unless originally equipped. Minimum wheel diameter is sixteen inches; maximum rim width is WM3 (2.15 inches). Wire spoke wheels or period correct cast wheels are required. Engine modifications must be consistent with the spirit of the class and comply with AMA and District 36 rules. Number of valves must stay as was available at the time of manufacture. Exhaust systems may be at the discretion of the promoter. Transmissions must be as original, no magnesium copies. Gear ratios may be changed; number of gears must be as original manufacturer. Brakes may be drum or disc type and may be updated, however disc brake calipers will not exceed the two-piston type (one each side). The following machines are eligible regardless of year model:
- Harley Davidson 350cc (Aeromacchi)
- BSA twin, single or triple
- Honda CB72 or CB77
- Rickman, powered by H-D, Matchless, AJS or other period engine
- Triumph twin, single or triple (1984 or earlier)
- Velocette
- Norton
- Cooper
- Bultaco
- Yamaha twin, XS650

-Yamaha single TT/XT/SR 500, two valve engine
-Moto Morini Pushrod V-twin

The following are class divisions that pertain to all vintage motorcycles entered in competition.

11.7.3 Late Model vintage: Motorcycles manufactured thru 1978 model years. General specifications for rim width and suspension travel limits do not apply to this class. Cantilever and monoshock chassis may be used in this class. Cantilever and monoshock chassis may be used in this class only and must be of the same design as was available in 1978. Any conventional forks may be used, no inverted or upside-down forks.

11.7.4 Modern Vintage: Motorcycles manufactured for 1974 model year or earlier. General specifications above apply, maximum fork diameter 37mm.

11.7.5 Classic Vintage: Motorcycle manufactured 1967 or earlier. May be two or four stroke. Motorcycles originally built by the manufacturer as a clubman racer or street bike. This class will basically be the engines and frames that were available in that era. Due to safety must have operational brakes as required by AMA and District 36. May run as a brakeless class if all entrants agree. Minimum offered engine size classes shall be 1) 0-250cc, 2) 500cc OHV/750cc side valve (500 OHV / 750 SV).

11.7.6 Dinosaur Vintage: Motorcycles manufactured 1951 or earlier. Motorcycle should be as original as possible, except where safety is a factor.

11.7.7 Fifty Plus (50+): this is a rider age class, all motorcycles must be vintage (1978 model year or earlier).

11.7.7.1 Master (60+): This is a rider age class. Any vintage class motorcycle is allowed.

11.7.7.2 Pushrod 500: 1. Any air-cooled motorcycle of model year through 1978 using pushrods to actuate the valves and any flathead. 2. Overhead valve: Up to 500cc (with overbores/overstrokes up to 525cc). 3. Flathead: Up to 750cc (with overbores/overstrokes up to 790cc). 4. Frames: Dual non-reservoir shocks on both sides of frame, maximum 36mm forks. 5. Rider Structure: This class shall be run “heads up” with no reference within the class to A/B/C rider status and no A/B/C advancement points shall be awarded for any results in this class. Riders are required to equip their bikes with their proper D36 number plate, including colors and numbers. (Rev. 15 Oct 2008)

11.7.8 Additional classes: the promoting organization may run additional classes beyond the minimums. Whether the classes qualify for District Vintage Championship or advancement points will be at the discretion of the appropriate steward. Special Note: Bikes that are original Class C equipment, or factory racers, that were raced during that period without brakes, with rigid frames and period tires will be allowed to practice and race only when separate from other classes where brakes are required.
11.7.9 Motorcycle Class Breakup: All classes will be contingent on four (4) riders to make a class. Consideration should be given to having riders grouped by rider skill class, then engine size (0-250, 251-600, 601-Open) 250 should not race against 251cc or larger if possible.

11.7.10 Protests: Will be in accordance with section 9.

11.7.11 Rider Advancement: The point system for rider advancement will be in accordance with Section 7. (Rev. 28 Nov 2007)
